TERMS OF REFERENCE FOR THE PROCUREMENT OF ICT SUPPLIES OF PHILIPPINE SCIENCE HIGH SCHOOL CALABARZON REGION CAMPUS

Background

The Philippine Science High School is mandated by the government to provide secondary education with emphasis on science and technology with the aim of preparing its students for STEM-related careers. The curriculum was design to equip students with the knowledge, skills, and attitude that are deemed to be essential in preparing for a STEM-related career. This aim is realized when instruction is aided with appropriate supplies and equipment.

I. Rationale

The Information technology Unit (ITU) as an integral part of the Philippine Science High School, continues its part in the holistic growth of its scholars. In order for the unit to properly execute its functions, ICT supplies are required to support the needs for repair and maintenance of ICT equipment through-out the campus. To prevent downtime of services provided by the campus, the ITU anticipates ICT or technical problems that may occur and hinder the capacity of a unit/division to provide service to the campus stakeholders.

Scope and Specifications

The supplier should be able to provide the listed supplies which includes the following minimum specifications.
